AL6B Series

Premium 16 SEER Split System Air Conditioners

R-410A Refrigerant and Innovative Design

The AL6B model uses R-410A refrigerant that's friendly to the environment and a stylish design that's easy on the eyes.

Energy Savings.

The 16 SEER¹ AL6B Series air conditioner can make a dramatic difference in your energy bill—cutting energy use up to 60% when compared to most central air conditioning systems over 10 years old.

Since it's been designed to match with a variable speed air handler or gas furnace, it reduces operating expenses while increasing your comfort. And it comes with R-410A refrigerant, which earns the EPA ENERGY STAR* logo and reduces impact on the atmosphere.

Cooling Has Never Been this Stylish.

The advanced AL6B Series gives you the comfort and cost-saving, energy-efficient performance that is part of the Fraser-Johnston[®] Performance Promise[™] – all in an attractive, innovative design that brings style to home cooling. With a sleek, contemporary look, it's one system you'll be proud to show—not hide behind bushes or fencing.

Enjoy the Quiet.

No wonder our Fraser-Johnston[®] system has such low sound ratings. In addition to the isolated compressor compartment, all moving parts were selected for quiet operation and specially mounted to reduce noise. Even the fan blades are designed to move air quietly. What's more, the upward airflow carries these soft, normal operating noises away from your home.

Designed for Efficiency, Reliability and Comfort.

The AL6B Series is engineered with reliable compressor technology with fewer moving parts for greater efficiency, reliability and comfort. It is equipped with proven scroll compressor technology to ensure reliable performance. With 16 SEER efficiency, it will cool your home with less energy even on the hottest days.

The Federal Government has established SEER (Seasonal Energy Efficiency Ratio) ratings to allow you to compare energy efficiencies of air conditioning equipment. The higher the SEER number, the more efficient the product.

The Fraser-Johnston™ Sound Reducing System combines special fan blade design with upward airflow to provide quieter operation.

Stamped coil guard provides the ultimate in coil protection

Isolated compressor compartment reduces noise

Fan guard design yields quieter and more efficient operation

Powder painted steel for long-term durability in the harshest environments

> Composite base pan won't rust and dampens sound

> > Uses environmentally friendly R-410A refrigerant

Designed for easier access to all components for faster and more economical serviceability

YEAR PARTS

A System That's Built to Last.

This unit's design has proven reliability and performance. And when we build a product this good, we're happy to stand behind it. So we back each unit with a 10-year limited warranty on compressors and a 10-year limited warranty on parts (must be registered online within 90 days of installation – otherwise the parts warranty reverts to a 5-year limited parts warranty).

Extended Warranty

Ask your dealer about our extended protection plan. You can have complete peace of mind – with additional parts-and-labor coverage on your system. Also ask about our lifetime limited compressor warranty. It applies to a matching Fraser-Johnston* system consisting of a Fraser-Johnston* AC/HP, furnace or air handler and coil. Non-matching Fraser-Johnston* system reverts to a 10-year limited compressor warranty.
