

# The Unico System<sup>®</sup>

Small-Duct Central Heating and Air Conditioning

*The Unico System's flexible supply tubing and outlet (with 2" diameter opening) fit into tighter spaces.*

## Your Home

### is Your Castle

Or if not your castle, then maybe it's your bungalow, brownstone, or Victorian. Perhaps it's a design the world has never seen before.

Whatever your home's style, the Unico System is the perfect fit. A superior heating and cooling system, its innovative "aspiration" system warms and cools your house evenly and quietly. Its revolutionary **flexible small-ducts** weave through the smallest spaces—ceilings, walls, even floors—so there is **no need for costly, messy renovation**. Once installed, you'll hardly notice the Unico System. All you'll know is that your home is perfectly comfortable—warm in winter, cool in summer, quiet all year round. You'll feel more at home, and because the Unico System provides this comfort without intrusive construction that compromises the architecture of your house, even your home will feel more like royalty.

## Retrofitting Restored Homes

The Unico System is the perfect heating and cooling system for restored homes. Featured in ten projects on television's *This Old House*, the Unico System is the superior choice for heating and cooling renovated homes. No gutting required: the small duct-work of the Unico System is so small and flexible—one-third the size of conventional sheet metal ducting—that it fits right into the existing construction of your home, weaving through ceilings, walls, and floors. Use the Unico System and you won't have to compromise your home's architectural integrity with soffits, dropped ceilings, or other unsightly additions.

The Unico System is as subtle on the walls as it is within them. It's small outlets will not streak and stain as conventional metal registers do, and blend perfectly into any décor. Paintable or stainable, outlets are available in round 5-inch or slotted 1/2-inch by 8-inch versions, and come in a variety of colors, finishes and wood species.

*Historic Renovation, St. Louis, MO*

## New Construction and Custom Homes

*New Construction, Laguna Beach, CA*

You are not like anyone else, so it's not surprising that your house is just a little bit different, too. The Unico System is the perfect choice for your custom-built home. It is a high performance heating and cooling system that uses flexible small-ducts, so it fits into any design—even in curved walls and cathedral ceilings—so that your imagination, not your ductwork, can be your guide when designing your home.

The Unico System is virtually invisible. Its small outlets will not mar the walls, and blend perfectly into your design. Paintable or stainable, outlets are available in round 5-inch or slotted 1/2-inch by 8-inch versions, and come in a variety of colors, finishes and wood species to match any aesthetic.

The system is easily included during the construction phase or after, with less mess and labor than traditional systems. Its quiet, draft-free air and even temperatures make your house feel as good as it looks.

You design it, we'll heat and cool it. Go ahead, dream big.

Whatever the age, size or design of your home, the high performance Unico System will deliver superior comfort without compromising its look and feel.

# The Unico System®

Small-Duct Central Heating and Air Conditioning

## LITTLE OR NO REMODELING NEEDED

The Unico System fits where conventional cooling and heating systems can't — with little or no remodeling required! The modular air handlers and coils can be installed easily into attics, ceilings, crawlspaces and closets. The flexible small-ducts can be routed through existing ceiling, floor and wall cavities, eliminating the need for unsightly and noisy metal ductworks.

Typical ductwork layouts showing 2 Unico systems —one located in the attic and one located in the basement.

## DRAFT-FREE, EVEN TEMPERATURES THROUGHOUT ANY ROOM

Conventional systems simply dump conditioned air into a room, causing uncomfortable drafts and hot and cold spots.

The Unico System gently circulates air throughout each room, eliminating drafts and providing even temperature from ceiling to floor.

## MATCHES ANY DECOR

ORIGINAL  
5" Outer Diameter Plastic Outlet for Ceiling Applications (Available in white, black, brass or chrome finishes)

WOODEN  
5" Outer Diameter Wood Outlet for Hardwood Floor Applications (Available in a variety of wood species)

SLOPED  
15° and 25° Angled Outlets for Sloped Ceilings and Walls

SLOTTED  
1/2" x 8" Slotted Outlet for Sidewall Applications (Available in a variety of finishes and wood species)

Outlets in the Unico System are small, subtle and blend into any décor. For the look that best suits your needs, a variety of styles and finishes are available. Choose from white or black plastic, chrome, brass and several wood species—or simply paint or stain the outlets to perfectly match your room.

Unico original round outlets are available in 2" inner diameter (5" outer diameter), as shown, and 2 1/2" inner diameter options.

## An Inspired Partnership

Unico, Inc. is a family-owned and operated company committed to the preservation of historic sites, homes, and places. To demonstrate this commitment, Unico, Inc. has partnered with the National Trust for Historic Preservation, the nation's leading protector of historically significant buildings and neighborhoods. Preserving your home's original beauty by installing the Unico System helps keep our nation's architectural history intact. Unico, Inc. and the National Trust for Historic Preservation thank you for your commitment to restoring and preserving North America.

“Because the Unico System fits where conventional systems can't, it preserves the integrity and aesthetics of the original architectural design of the house or national landmark.”

- Richard Moe, President  
the National Trust for Historic Preservation
